

**SCOTTISHPOWER WORKS – CLERMISTON ROAD NORTH / QUEENSFERRY ROAD / DAVIDSONS
MAINS EDINBURGH.**

REF – MB.D001594 JUNE 2018

Dear Resident(s),

ScottishPower will commence high voltage cable installation works in your area in the next few weeks. This is part of a major investment project to upgrade our network and modernise our equipment. This will involve some disruption to traffic as our excavations will be in the main carriageway. Clancy Docwra will be our main contractor for this work.

We will commence works on June 18th 2018 for a period of 6 weeks. The first two weeks will involve cable excavation works at Clermiston Road North and Quality Street. Clermiston Road North junction at Queensferry Road will be closed for this duration. The following 4 weeks will involve excavations along Queensferry Road between Quality Street and Clermiston Road North. There will be major traffic management for this part of our work which will be changed on a daily basis to cater for rush hour traffic.

Your electricity supply will not be directly affected by this work.

If you have any issues or queries regarding this work please contact me on the contact number(s) below and I will assist you.
